

CONTENTS

Preface.....	iii
I. Introduction.....	I-1
A. Best Available Science.....	I-1
B. Organization of the Report.....	I-1
II. Nearshore Ecology Overview	II-1
A. Defining the Nearshore	II-1
B. Habitat Classification	II-2
C. Defining Function	II-3
D. Nearshore Ecologic Models	II-3
III. Nearshore Physical Processes	III-1
A. General Description	III-1
1. Feeder Bluffs.....	III-2
2. Sediment Supply and Availability	III-5
B. Coastal Processes	III-6
1. Tides.....	III-9
2. Wave Characteristics	III-11
C. Sediment Transport Processes.....	III-18
1. Drift Cells.....	III-18
2. Cross-Shore Transport	III-20
3. Seasonal Variations.....	III-22
D. Key Findings and Conclusions	III-22
IV. Nearshore Habitats of Bainbridge Island.....	IV-1
A. Nearshore Habitat Classification Systems	IV-1
B. Habitat Structure, Diagnostic Species, Functions, and Stressors.....	IV-2
1. Eelgrass Meadows	IV-3
2. Kelp Forests	IV-5
3. Flats.....	IV-7
4. Tidal Marshes.....	IV-9
5. Subestuaries (River Mouths and Deltas).....	IV-11
6. Sand Spits.....	IV-12
7. Beaches and Backshore.....	IV-13
8. Banks and Bluffs.....	IV-14
9. Marine Riparian Zones	IV-15
V. Nearshore Biological Resources (Faunal Assemblages)	V-1
A. Selected Benthic Macroinvertebrates.....	V-1
1. Hardshell Clams.....	V-1
2. Dungeness crab (<i>Cancer magister</i>).....	V-4
B. Fishes.....	V-5
1. Forage Fish.....	V-5

2. Salmonids.....	V-10
3. Groundfish	V-17
C. Marine Birds.....	V-20
D. Marine Mammals	V-22
VI. Effects Of Nearshore Modifications	VI-1
A. Shoreline Stabilization Structures.....	VI-1
1. Types of Structures.....	VI-1
2. Regional Focus - Bainbridge Island.....	VI-3
3. Impacts – Physical Processes and Biological Considerations	VI-7
4. Management Recommendations.....	VI-12
B. Overwater/In-Water Structures	VI-13
1. Types of Structures	VI-13
2. Regional Focus - Bainbridge Island.....	VI-15
3. Impacts – Physical Processes and Biological Considerations	VI-16
4. Management Recommendations.....	VI-18
C. Dredging/Filling.....	VI-19
1. Types of Modification.....	VI-19
2. Regional Focus - Bainbridge Island.....	VI-19
3. Impacts – Physical Processes and Biological Considerations	VI-20
4. Management Recommendations.....	VI-20
D. Pollution.....	VI-21
1. Sources.....	VI-21
2. Regional Focus - Bainbridge Island.....	VI-21
3. Impacts – Physical Processes and Biological Considerations	VI-23
4. Management Recommendations.....	VI-24
VII. Conclusions and Recommendations	VII-1
A. Conclusions.....	VII-1
B. Recommendations	VII-4
VIII. References	VIII-1
IX. Glossary of Terms.....	IX-1
X. Appendices.....	X-1
A. Bainbridge Island Nearshore Assessment Maps.....	X-3
B. Nearshore Classification Systems	X-15
C. Acronyms and Abbreviations.....	X-17

FIGURES

Figure II-1.	Nearshore section illustrating typical tidal zonation.....	II-1
Figure II-2.	Generalized distribution of major intertidal habitat types along an elevation (depth) gradient.....	II-2
Figure II-3.	Conceptual model linking shoreline impacts to ecological functions	II-5
Figure III-1.	Bluff erosion and littoral transport alongshore	III-3
Figure III-2.	Factors related to erosion of the nearshore upland	III-4
Figure III-3.	Effects of vegetation in minimizing erosion.....	III-5
Figure III-4a.	Spit, marsh, & lagoon at Battle Point	III-7
Figure III-4b.	Cuspate foreland at Yeomalt Point	III-7
Figure III-5.	Rock outcrop at Restoration Point	III-8
Figure III-6.	Tidal datums for the Seattle Station.....	III-8
Figure III-7.	Example tide signature for the Seattle Tide Gauge	III-9
Figure III-8.	Surface wave definition.....	III-12
Figure III-9.	Wave refraction.....	III-16
Figure III-10.	Current systems.....	III-17
Figure III-11.	Spit, lagoon, and tidal flat at Point Monroe	III-20
Figure III-12.	Spit, tidal delta, lagoon, and tide flat at Fletcher Bay.....	III-21
Figure III-13.	Sediment loss and supply on a coastal shoreline.	III-21
Figure IV-1.	Eelgrass meadow.....	IV-3
Figure IV-2.	Bull kelp morphology.....	IV-6
Figure IV-3.	Bull kelp forest.....	IV-6
Figure IV-4.	Tide flats in Murden Cove	IV-8
Figure IV-5.	Tidal marsh in Eagle Harbor.....	IV-10
Figure IV-6.	Subestuary at Murden Cove.....	IV-11
Figure IV-7.	Sand spit, marsh and lagoon at Battle Point	IV-12
Figure IV-8.	Beach and backshore at Fay Bainbridge State Park.....	IV-13
Figure IV-9.	Bank and bluff at Rolling Bay	IV-15
Figure IV-10.	Riparian zone in Seabold area.....	IV-16
Figure V-1.	A variety of hardshell clams.	V-3
Figure V-2.	Geoduck clam (<i>Panopea abrupta</i>).....	V-4

Figure V-3.	Dungeness crab (<i>Cancer magister</i>).....	V-4
Figure V-4.	Pacific sand lance (<i>Ammodytes hexapterus</i>).....	V-7
Figure V-5.	Surf smelt (<i>Hypomesus pretiosus</i>).....	V-8
Figure V-6.	Pacific herring (<i>Clupea harengus pallasii</i>).....	V-9
Figure V-7.	Temporal phases of anadromous salmon life history.....	V-11
Figure V-8.	Pacific cod (<i>Gadus macrocephalus</i>).....	V-18
Figure V-9.	Harbor seal (<i>Phoca vitulina</i>).....	V-23
Figure VI-1.	Illustrations of hard approaches to shoreline stabilization. Top: vertical smooth bulkhead; Middle: revetment; and Bottom: groins.....	VI-2
Figure VI-2.	Illustrations of soft approaches to shoreline stabilization. Top: nourishment with gravel and sand; Middle: large woody debris; and Bottom: vegetation....	VI-3
Figure VI-3.	Vertical bulkheading along Rolling Bay.....	VI-4
Figure VI-4.	Vertical bulkheading along Port Orchard Bay.....	VI-4
Figure VI-5.	Groin.....	VI-5
Figure VI-6.	Groin field.....	VI-6
Figure VI-7.	Naturally occurring large woody debris stabilizing shoreline.....	VI-7
Figure VI-8.	Relative beach impact versus shore protection method.....	VI-8
Figure VI-9.	Changes in the beach at Lincoln Park following seawall construction in the mid 1930s.....	VI-11
Figure VI-10.	Pier with float.....	VI-14
Figure VI-11.	Floating dock.....	VI-14
Figure VI-12.	Marina in Eagle Harbor.....	VI-15
Figure VI-13.	Washington State Ferry Maintenance Facility.....	VI-15
Figure VI-14.	Docks in Port Madison Bay.....	VI-16
Figure VI-15.	Open water moorage in Eagle Harbor.....	VI-16
Figure VI-16.	Outfall locations for Bainbridge Island.....	VI-22

TABLES

Table II-1.	List of Controlling Factors and Associated Habitat Structural and Functional Attributes.....	II-4
Table III-1.	Grain-Size Classifications.....	III-3
Table IV-1.	Eelgrass Meadow Habitat.....	IV-4

Table IV-2.	Kelp Forest Habitat	IV-6
Table IV-3.	Flats Habitat	IV-8
Table IV-4.	Tidal Marsh Habitat	IV-10
Table IV-5.	Subestuaries Habitat.....	IV-12
Table IV-6.	Sand Spit Habitat	IV-12
Table IV-7.	Beaches and Backshore Habitat.....	IV-13
Table IV-8.	Banks and Bluffs.....	IV-15
Table IV-9.	Marine Riparian Habitats.....	IV-16
Table V-1.	Common and Scientific Names of WDFW Priority Fish Species.....	V-6
Table V-2.	In-Water Work Windows for Forage Fish	V-7
Table V-3.	Salmonids: Summary of Nearshore and Estuarine Habitat Use and Spawning on Bainbridge Island.....	V-13
Table V-4.	In-Water Work Windows for Salmon in Kitsap County	V-15
Table V-5.	Documented or Presumed Presence of Salmonids in Bainbridge Island Subbasins.	V-16
Table V-6.	Summary of Nearshore Marine Habitat Use by Important Groundfish Species in Washington State.....	V-17
Table V-7.	101st and 102 nd Christmas Bird Counts, December, 2000 and 2001.....	V-22
Table VI-1.	Summary of Armoring Effects to Resource Species in Puget Sound.....	VI-10
Table VI-2.	Summary of the Advantages and Disadvantages of Various Shore Protection Alternatives.....	VI-12
