Subject: Project Change - Strawberry Plant Restoration

Hi Libby, I've received the information you sent regarding the property boundaries outlined in the original project description for the Strawberry Plant Restoration project. The adjustment to the original property boundary is quite minimal in relation to the overall footprint of the proposed project and therefore we do not require a scope change. While it would be nice to include the property at the mouth of Weaver Creek as part of the overall restoration we understand this is not an option at this time. Thank you for making us aware of this change and please let us know if we can be of any help in the future. We look forward to the successful restoration of the Strawberry Plant property and completion of this project.

Thank You.

Dave
